

TRASSAR[®] 6 ENERGY

Machine for urban and road markings

- Quiet and environmentally friendly electric motor
- Unrivalled ergonomic design and usability
A wealth of features for users
- "Bespoke" configuration
A durable machine designed with a standard pack and several optional items

Areas of application:

Marking types: **line markings and specialised works for all road networks**

Application technique: **airless**

Applicable products: **paints and two-component products (liquid/solid)**

60 kg paint

for marking approximately
a 120 sq. metre area
or 1,200 linear metres of 10 cm-wide lines
or 800 linear metres of 15 cm-wide lines

**Autonomy: 250 kg of
continuous painting** per load

Ergonomic design
Operating cost
Reliability / Quality

ERGONOMIC DESIGN & VERSATILITY

- Electric motor for **use during the day, at night or in enclosed spaces** without any noise pollution or greenhouse gas emissions
- Adjustable multi-position handlebars in **compliance with "movements & postures" requirements** for improved user **comfort**
- Swivel front wheel **for easily marking** curved lines and **manoeuvring** in tight spaces
- Space for the **direct use of a paint container** (25 kg) or tank (60 kg), positioned to keep the machine well balanced
- Marking spray gun mounted on a folding, height-adjustable support using a rack and pinion system for **easily adjusting the line width (from 5 to 50 cm)**

PERFORMANCE / OPERATING COST / DURABILITY

- 24 V electric motor with lithium-ion batterie
- **Modular and scalable** machine
- Components from **leading brands** to guarantee **reliability, robust and durable** equipment
- Paint pump:
 - **Hydraulic drive** without an electromagnetic clutch for **productive and comfortable application**
 - **Optimally sized components** for an **extended service life**
 - **Exclusive automatic wear compensation system** for seals to **double or triple their service life**
 - Position specifically designed to ensure **easier maintenance**

SUSTAINABLE DEVELOPMENT / ENVIRONMENT

- Over **96% recyclable**
- **Electric motors**: a real solution for **reducing the carbon impact and noise pollution from marking operations**
- Machine designed for use with **water-based** paints, which are highly recommended as an alternative to harmful solvent-based paints, to help **decarbonise road marking operations**

Extra product **+** benefits:

Lithium-ion batteries for long operating times
Low electrical risk (24 V circuit)

SPECIFICATIONS

<i>Airless paint pump flow rate</i>	<i>5.7 litres/min</i>
<i>Unladen weight</i>	<i>170 kg</i>
<i>Overall length (handlebars unfolded/folded)</i>	<i>1.83 m / 1.66 m</i>
<i>Overall width (marker folded)</i>	<i>0.83 m</i>
<i>Height without/with a bead tank</i>	<i>1.06 m / 1.38 m</i>
